# MC-808 *sampling groovebox*

for Microsoft® Windows® XP/2000/Me for Mac OS COSM V-LINK USB CompactFlash Editor Software Included

## Sampling Groovebox with Motorized Faders

A live-performance dream machine, the MC-808 is a full-featured sampling groovebox with a twist: It has eight motorized faders on its surface — a groovebox first! No matter what pattern you call up, the faders will snap to the proper position, allowing you to see the values instantly and make changes directly. No more unexpected jumps in values when you grab a fader in mid-performance. The MC-808's internal sounds and patterns have been created by acclaimed artists around the world. These slammin' new dance and hip-hop grooves are instantly ready for primetime. And not just a treat for the ears, the MC-808 can interact with Roland/EDIROL's motion dive .tokyo performance package via V-LINK to create an incredible audio/visual performance in real time. With Roland's most sophisticated processor at its core, the MC-808 is ideal for serious beat-makers, producers, remixers, live performers, keyboardists, guitarists, bassists, DJs, and more.

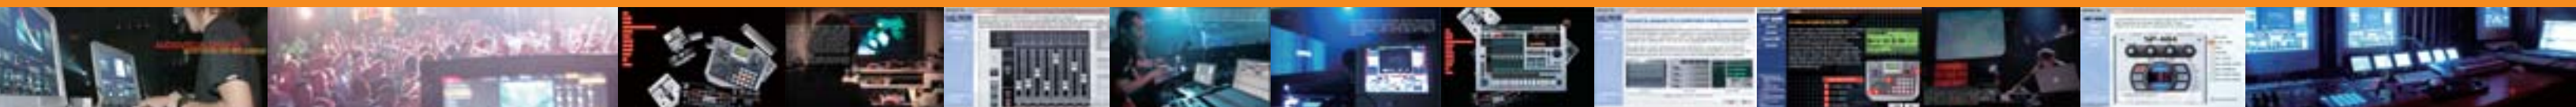

### Visual editing on your computer screen

The included MC-808 Editor for Mac and PC allows you to edit patches and sample waveforms visually from your computer screen.

for Microsoft® Windows® XP/2000 for Mac OS X

# SP-606 Sampling Workstation

for Microsoft® Windows® XP/2000/Me/98 for Mac OS COSM USB AUDIO V-LINK CompactFlash WDM ASIO™

## Standalone Phrase Sampler with a Computer Companion

Lightweight, but packed with heavy grooves, the SP-606 does it all. It combines sampling, phrase sequencing, audio editing, multi-effects, performance tools, computer connectivity, and soft-synthesis into one user-friendly package. You can sample sounds into the SP-606 via computer through the USB-AUDIO input and apply amazing effects. Use the SP-606's enhanced V-LINK mode for realtime audio/visual interaction with Roland/EDIROL's motion dive .tokyo performance package. Every SP-606 is bundled with Cakewalk's P606 phrase generator/virtual groovebox — a great tool for creating an endless stream of fresh grooves.

Bundled with new P606 software from Cakewalk for enhanced integration and functionality with a PC, via USB cable

# SP-404 Sampler

CompactFlash™

## Portable Power-Sampler with Effects

The Roland SP-404 makes sampling easy — just hit RECORD and instantly play your sample from a pad. This diminutive sampler is designed for on-the-go recording, yet boasts 12-voice polyphony and nearly five minutes\* of internal recording with 24 User memories. Need more? Use an optional CompactFlash card for nearly six hours\* of sampling and 96 memory locations! Like previous SP-Series samplers, the SP-404 includes powerful DSP effects for serious sound sculpting.

\*WHEN [MONO] [STANDARD] MODE IS SELECTED.

\* The SP-606's and the SP-404's file system is developed by Kyoto Software Research, Inc. Fugue ©1999-2006 Kyoto Software Research, Inc. All rights reserved.
